Text formatting

I want to be a part of the people that make meaning, not the thing that is made.

underline small caps

Images and Figures

Quarto allows for [easy cross-references of images and plots](#). Figure 1 shows an image, whereas Figure 2 shows a plot created using ggplot2.

To find more about the dataset used to create Figure 2 type the following line of code into the console:

```
?ToothGrowth
```

Figure 1: This is a very handsome groundhog that is excited about statistics.

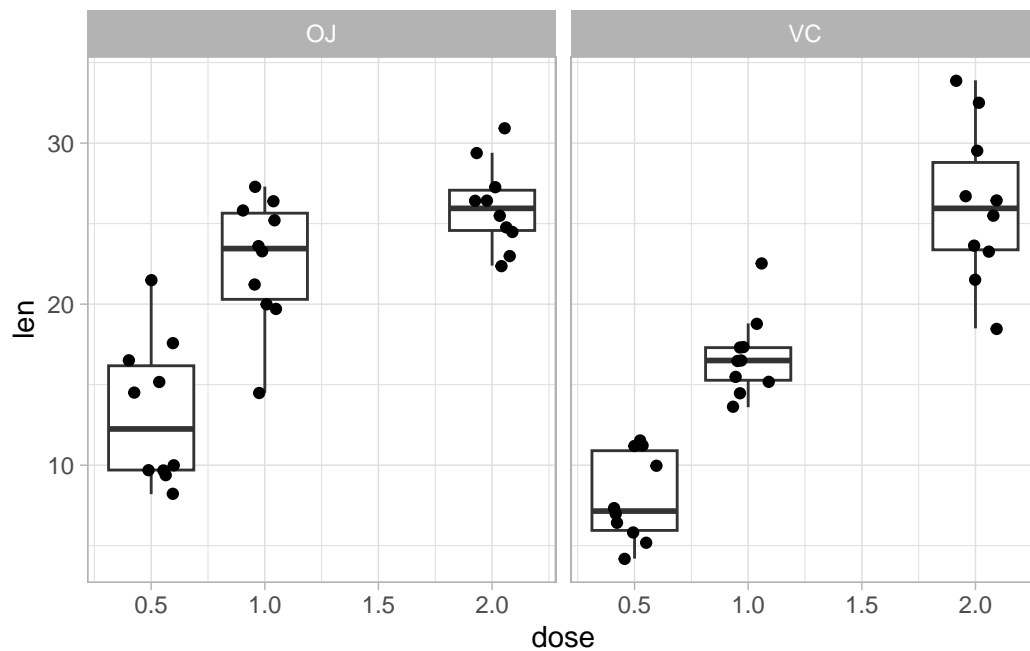

Figure 2: This plot shows the effect of vitamin C on tooth growth in Guinea Pigs. The response is the length of odontoblasts (cells responsible for tooth growth) in 60 guinea pigs. Each animal received one of three dose levels of vitamin C (0.5, 1, and 2 mg/day) by one of two delivery methods, orange juice or ascorbic acid (a form of vitamin C and coded as VC).

Equations

It's also easy to cross-reference equations. For example, Equation 1 depicts the *fundamental theorem of calculus*.

$$2x + 3y^2 = \tag{1}$$

Tables

We can also cross-reference tables easily, as shown in Table 1 and Table 2.

Table 1: This table was created using Markdown.

Col1	Col2
a	b
c	d

Table 2 shows some very simple regression models.

Table 2: This table was created using the `modelsummary` package

	Model 1	Model 2	Model 3	Model 4
(Intercept)	17.147*** (1.125)	14.594*** (0.926)	23.334*** (2.233)	24.832*** (2.890)

Ask Steve what he thinks about those asterisks! (Steve, what do ya think?)

Citations

Finally, Quarto has great Zotero integration.

Hello—my name is Lauren. Some of my recent favorite sociological texts include Treitler (2013) and Bonilla-Silva (2006) (shout-out Eduardo!). On my short list of articles to read is John U. Ogbu's "A cultural ecology of competence among inner-city blacks" (Ogbu 2013).
